## The German Gypsum Block - Solid Drywalls for Domestic Construction

A tongue and groove solid partition system produced in accordance to EN 12859 with key features and benefits as below:

- Without the use of steel frame for wall up to 7m height.
- 4 hours FRP as tested in accordance of BS 476 Part 22.
- High acoustic performance, 100mm thick with STC 45.
- Biological and harmless components, odor neutral, no gas emitting substances.
- BEAM Plus accredited.

## Naturally Healthy Material - Gypsum

The main component of gypsum products is the mineral binder gypsum, also known as calcium sulphate ( $\text{CaSO}_4$ ). MultiGips Gypsum products are also low in environmental impacts, interior emissions and radioactivity. All values are approved by external laboratories in accordance with ISO 14025 and EN 15804.

## Free from Radioactive Material

MultiGips Gypsum products are Non-TENORM, safeguarding the health and safety of the environment and user. See our MultiGips R48 & Super R48 gypsum block, specially formulated models for radiation protection.

~~TENORM~~

TENORM refers to the hazardous "Technologically Enhanced Naturally Occurring Radioactive Materials"
